JIMINY's Personal Trainer

After the JIMINY Self-help Handbook comes the time to develop another crucial tool in this continuous learning process - JIMINY Personal Trainer.

The process of developing skills and competences is a longlife journey. This learning path requires supporting and engaging tools to guide us in this journey and assess the achievement of our objectives.

The JIMINY Personal Trainer is an artificial intelligence-driven personal trainer capable of acting as an end-to-end solution securing and supporting the whole learning and upskilling processes. JIMINY Personal Trainer is able to diagnose individual needs and provide a customised learning path as an instant remedy.

The innovative character of the JIMINY project can be clearly seen in the modern and effective learning methodology that the project consortium is applying in order to support the target groups - disadvantaged adults and adult learners.

JIMINY's journey

DISSEMINATION

As well-known, dissemination has an important role in every idea and project. If there is no information, no one knows what is being done or even that the idea or project exists.

Since the last newsletter edition in April 2020, many efforts have been made in the continuous dissemination of the JIMINY project.

Even with the current circumstances related to the global situation because of COVID-19, the dissemination has been constant and updated, in an adaptation to such a different reality.

The JIMINY Facebook page is dynamic and a source of useful posts showing case JIMINY's mission and objectives, with interesting and useful articles about emotional intelligence, digital awareness and entrepreneurship.

This is a joint and organised task among the project's partners who contribute with multiple perspectives for the page's feed.

Local articles are, **PARTNERSHIP** of relevant information and dissemination in each of the partnership countries.

The first article was developed in September focusing the main themes and project's developments such as the JIMINY Self-help Handbook, emotional intelligence, digital awareness and entrepreneurship lifestyle.

“Education is a Journey not the destination.”

3rd JIMINY PROJECT MEETING

With the world-pandemic context of COVID-19, the partnership of JIMINY has been keeping regular online cooperation and is using suitable online tools to meet virtually, ensuring the proper implementation of the project.
